

New contract with EDP for the 2019-2020 period

100% of the power supplied to all ENAIRe centres comes from renewable energies

- Since 2016, ENAIRe has saved 50,000 tonnes of CO₂ by using clean energy
- This initiative is the result of ENAIRe's commitment to fight climate change and to the sustainable development of air transport, in keeping with the goals of the 2030 Agenda

Madrid, 1 July 2019

ENAIRe, Spain's air navigation manager, has signed a new contract to have 100% of the electricity at all its air traffic control centres, its headquarters and other facilities supplied by renewable energies.

This contract, awarded to the EDP electricity marketer and valued at 9.2 million euros for the 2019-2020 period, renews ENAIRe's commitment to fight climate change and in favour of the environmental sustainability of air transport.

This initiative, contained in ENAIRe's Strategic Plan, 2020 Flight Plan, is part of ENAIRe's contribution to the Sustainable Development Goals of the UN's 2030 Agenda.

Strategy against climate change

ENAIRe's strategy against climate change, part of its 2020 Flight Plan, envisages the implementation of various activities that will help to reduce carbon dioxide emissions:

- **Flight efficiency:** it is estimated that 5.5 million nautical miles will be saved by designing more direct air routes in coordination with the Ministry of Defence. This measure allows reducing fuel consumption and harmful emissions.

- **Renewable energies:** since 2016, ENAIRE has purchased its electricity from renewable sources, which has translated into saving more than 50,000 tonnes of CO₂.
- Commitment to **photovoltaic energy and self-sufficiency** in coming years.
- Measurement and control audits to improve **energy efficiency**.

About ENAIRE

ENAIRE is the company belonging to the Ministry of Development that provides air navigation services in Spain. It renders aerodrome control services at 21 airports, including the busiest in terms of air traffic, plus en-route and approach control, from five control centres: Barcelona, Madrid, Gran Canaria, Palma and Seville. In addition, 45 air control towers receive communication, navigation and surveillance services from ENAIRE.

In 2018 ENAIRE handled 2.1 million flights to and from four continents (Europe, America, Asia and Africa), transporting 300 million passengers.

ENAIRE is the fourth most important European air navigation service provider, and, in a clear commitment to the Single Sky initiative, belongs to international partnerships such as SESAR (Single European Sky ATM Research) Joint Undertaking, SESAR Deployment Manager, A6, iTEC, CANSO (Civil Air Navigation Services Organisation) and ICAO (International Civil Aviation Organization).
