

## ENAIRe, finalist in the CANSO "Global Safety Achievement Award"

- ENAIRe has developed its innovative NOM project, a set of tools to monitor operations in an effort to improve safety
- Canso, a global organisation that represents the interests of air navigation service providers, presents its "Global Safety Achievement Award" annually to recognise excellence in safety
- ENAIRe is amongst the 6 finalists of the 20 candidates presented

### Madrid, 22 February 2021

ENAIRe has been nominated to receive the "Global Safety Achievement Award" that is presented annually by CANSO (Civil Air Navigation Services Organisation), a global organisation that represents the interests of air navigation service providers.

Canso uses this award to recognise the operational safety excellence of that entity that has contributed significantly to reducing aviation risks in the last twelve months.

ENAIRe has reduced the number of severe incidents in recent years and is ranked first in Europe thanks to its Safety Management System.

The nominated project, developed by the team consisting of Jesús Romero and Alberto Rodríguez, from ENAIRe's Operational Safety Division, is called NOM (Normal Operations Monitoring) and relies on a set of tools to monitor operations in order to improve safety. These tools include contemporary approaches such as "Safety II" (which consists of learning from normal operations in towers and control centres, as well as from incident investigations), and principles of systems thinking, resilience engineering and human performance science. These processes collect information from real operations that are eventually confirmed using big data tools.

This yields complementary methods for measuring safety that are more focused on a systemic and process-oriented approach. These processes, together with others implemented by ENAIRe, have helped to reduce the number of serious safety incidents, and led to more efficient intervention

plans while providing greater support for the process of making safety-related decisions.

### About ENAIRE

ENAIRE is the air navigation service provider in Spain.

As a company of the Ministry of Transport, Mobility and the Urban Agenda, it provides en route control services for all flights and overflights from five control centres in Madrid, Barcelona, Seville, Gran Canaria and Palma, as well as approach services to every airport in the country.

In addition, 45 control towers receive ENAIRE's communication, navigation and surveillance services, and 21 airports, including the country's busiest, rely on its aerodrome control services.

ENAIRE is the fourth most important European air navigation service provider, and, in a clear commitment to the Single Sky initiative, belongs to international partnerships such as SESAR Joint Undertaking, SESAR Deployment Manager, A6 Alliance, iTEC, CANSO and ICAO.

ENAIRE is the official provider of aeronautical information in Spain.
